- **Testing:** Jest, Tape.
- **Soft skills:** Problem Solving, Documentation Reporting, Team Player, Test Driven Development, Design thinking

WORK EXPERIENCE

Intern, Coding Foundation at Gaza Sky Geeks- 1/2022 - 5-2022

After 4 months of learning and experience in GSG starting with the native basis of front-end (HTML5 & CSS3) and fetching data with xhr, fetch, Axios, then started the journey of back-end with vanilla node and express and learned how to connect the database to them and finally back to the front-end with react (class & hooks). After all of that, I could gain enough knowledge to start my career in web development as a skilled developer that is ready for the outworld projects and jobs.

Intern, Coding Foundation at Gaza Sky Geeks- 6/2021 - 10-2021

We spent four months learning programming basics, In the first part of the program, we learned programming logic including a brief look into different algorithms, throw the second part we learned front end development basics including html5, css3, javascript, and we created simple web pages and the last part of the internship we start dealing with control version system git and git

And we Improved soft skills and English language.skills
